QT720 Payment Terminal

Integrated *EFTPOS*
Lightning fast !

airPay™
CONTACTLESS PAYMENTS

Perfect for Retail & Hospitality, the **QT720** combines an ergonomic handheld design with a rugged and sleek exterior. Fast transaction speeds, large PIN entry keys with 'Never wear out' labelling and brilliant backlit display make the **QT720** the leader in its class.

Certified to PCI-PTS 2.0 & EMV Chip card standards, the **QT720** is a highly secure terminal excelling in demanding situations.

ROBUST QUALITY

Attention to quality during the design and manufacture process has resulted in innovations that make the QT720 unique in the marketplace. The combination of an in-mould decoration (IMD) keypad that won't wear out, landing contact chip card reader, as well as built in protection against dust and liquid, ensures the QT720 will perform consistently in demanding environments and under the heaviest of transaction volumes.

ERGONOMIC STYLE

Sleek lines, a small footprint, oversized keys, and a crystal-clear white backlit display sets the QT720 apart from other payment terminals. Combine those features with a context-sensitive backlit keypad and light guided chip card entry, and the result is an entirely intuitive transaction process for both merchants and cardholders.

CHIP & PIN PAYMENTS

SPECIFICATIONS

PROCESSOR
32 Bit RISC microprocessor

MEMORY
8MB Flash + 8MB SDRAM

SMART CARD READER
Rated for 500,000 insertions
Asynchronous ISO 7816 & EMV Level 1Illuminated entry slot

MAGNETIC STRIPE READER
Tracks 1/2/3, Bi-directional
ISO 7811 compliant

CONTACTLESS
airPay AP1 Contactless Reader (Accessory) (EMV Level 1), ISO 14443 type A, B
Field upgradeable (no tools required, firmware update required)

SECURITY
PCI-PTS 2.x approved
APCA CS3 CECS approved
DES, 3DES, RSA encryption
Application Author Authentication

DISPLAY
128 x 64, white backlit graphics display
Variable size fonts
Logo support

KEYPAD
15 key backlit keypad
'Never wear out' IMD technology
Context sensitive backlighting

INTERFACE OPTIONS
115Kb RS232 (standard)
USB 2.0 (standard)
Bluetooth module (optional)
Ethernet module (optional)

WIDE AREA COMMS
V.22bis Dial/Leased module (optional)
GPRS module (optional)

SUPPLY VOLTAGE
12 volts DC

PHYSICAL DIMENSIONS
L 177mm x W 78mm x D 45mm
Weight: 324g (excl. AP1)

ACCESSORIES
Swivel Stand with Rugged Holster

CONTACTLESS PAYMENTS

The airPay contactless reader module for QT720 will allow your customers to pay for their purchases simply by holding their Visa payWave™ or MasterCard® PayPass™ contactless cards within close range of the contactless reader. Your customer queues will reduce as low value transactions are processed without the need for a PIN or signature.

Suitable for any business with high-volume low-value transactions, contactless particularly benefits cafés, convenience stores, supermarkets, fast-food outlets, fuel outlets, or cinemas.

airPay™

TERMINAL INTEGRATION

Integrated with Quest's EftposPlus Enterprise or EftposPlus Express middleware, or interfaced directly into legacy or non-PC based cash registers, the QT720 delivers a fast and flexible solution for connection to your acquirer.

SECURITY COMPLIANCE

The QT720 has undergone rigorous evaluation to ensure it is universally compliant with EMV Level 1, EMV Level 2 and PCI PTS global standards. Its 32 bit RISC microprocessor delivers high performance cryptographic functions and unrivalled transaction speed.
