# Airpay TAP

# Tap to Phone with PIN
## Just an App. No card reader required!

**Airpay TAP** (Tap And PIN) is a Tap to Phone smart software solution (sometimes called Soft POS) that turns NFC enabled Android smartphones, tablets and other handheld devices into payment terminals.

It eliminates the need for separate card readers to accept contactless transactions and supports all types of EMV based cards, digital wallets and wearables.

Airpay TAP supports not only tapping a contactless card or device, but also the secure entry of a PIN as verification for higher value transactions.

Airpay TAP makes it easy for Acquirers, App Developers and Retailers to unlock new customer experiences by enabling payments on a merchant's mobile device.

## Supports most Android devices

SAMSUNG   xiaomi   G   ONEPLUS   OPPO   SONY   ZEBRA   Honeywell   + MORE

## Accepts popular payment methods

VISA   eftpos   AMERICAN EXPRESS   mastercard   UnionPay 银联   DISCOVER   Alipay   WeChat Pay

afterpay   zip   Pay   G Pay   SAMSUNG Pay   humm

## Acquirers

Provide an innovative, leading edge solution to your merchants. Offering Tap to Phone with PIN eliminates the cost of purchasing and supporting hardware, swap outs and repairs. Quest offers modular integration options, allowing Acquirers to quickly integrate their transaction processing and settlement systems, whilst choosing from POS apps and onboarding systems from Quest and/or another supplier..

## Retailers

Airpay TAP is intuitive to use and can integrate to your existing Android or iOS app. It can accept payments anywhere, anytime and without the need or cost of additional payment hardware on Android devices.

## App Developers

Integrate payments into your app to Airpay TAP using our Software Developer Kit (SDK). Once integrated, the Airpay TAP SDK takes care of card payments and security, whilst the app focuses on delivering value to merchants.

Airpay TAP is an acquirer agnostic solution which can be used globally with any supported acquirer, allowing you to get to market quickly, then scale with a fast, secure and robust payment processing partner.

## Airpay Readers

**Do you have an Apple device? Or prefer a dedicated contactless tap point?**

Airpay TAP also connects to a variety of Airpay readers via bluetooth. This provides merchants an end-to-end payment solution, no matter their brand of mobile device.

**MT330**

**AP³**

Contactless Reader with display
55mm × 55mm × 10mm

Contactless, Insert, Swipe & PIN
90mm × 61mm × 22.5mm
