Donation Point™ KIOSK

Donation Point™ PRODUCT RANGE

Helping you make a bigger difference

The Donation Point Kiosk allows Not-For-Profits to accept donations of any size and collect donor data in a completely unattended environment.

Quest's intuitive donation software allows Not-For-Profits to control the look and feel of their kiosks. Donors can select from a number of preset donation values, as well as being provided with the option to manually enter a custom donation value.

The Kiosk is able to be remotely managed via Quest's cloud based management service Cloud EFTPOS. Cosmetic changes such as text, images or colour schemes can be updated in real-time, as well as configuring the preset donation values.

FEATURES

| ACCEPT ALL CARDS | LIGHTWEIGHT & PORTABLE | DAILY SETTLEMENT | COLLECT DONOR DATA | CUSTOMISABLE | LARGER DONATIONS |

Cloud EFTPOS

Cloud EFTPOS is your online web portal for management of your fleet of Quest devices. Accessed through any browser, Cloud EFTPOS offers a centralised way to monitor, configure and update devices, as well as providing transaction reporting on donations received.

FEATURES & BENEFITS TO CHARITIES

- Remote Management of your Kiosk text, images and fonts via Cloud EFTPOS.

- Reduction in cash collection and management costs compared to traditional volunteer-led fundraising.

- Bespoke donation software allows for quick, easy donations of any size.

- Ability for supporters to electronically opt-in for further communications from your charity using their email address and/or mobile phone number.

- Software updates are remotely managed, allowing for the latest features to be installed without the need of an on-site technician.

- Customisable notes field allows your supporters to communicate the reason for leaving their donations.

- Lightweight design enables the kiosk to be moved between targeted high traffic areas to maximise supporter yield.

CUSTOMISE YOUR KIOSK!

Quest can provide software to run on your Donation Point Kiosk, or you can choose to develop your own Kiosk application using the Quest SDK. Quest's open software platform has been designed to allow for future development as your charity evolves.
